

USB Digital Signage Display

User Manual

For Model: NC-A24D-24D-26

Ver. 2026 September

Usage Notes

- This product automatically plays files located in the root directory of the storage device (such as a USB drive or SD card). To play files within a subdirectory, use the remote control to select them manually.
- This product supports sorting file names by numbers and letters, but does not support sorting by Chinese characters. The sort order is as follows: numbers are sorted first, followed by letters — numbers from 0 to 9, then letters from uppercase A–Z to lowercase a–z.
- To play files with Chinese file names in a specific order, add a number or letter before the Chinese file name when saving, e.g. "100 Chinese.avi" or "A Chinese.mpg".

	USB Flash Drive Format	FAT32

About displaying photo playback in vertical

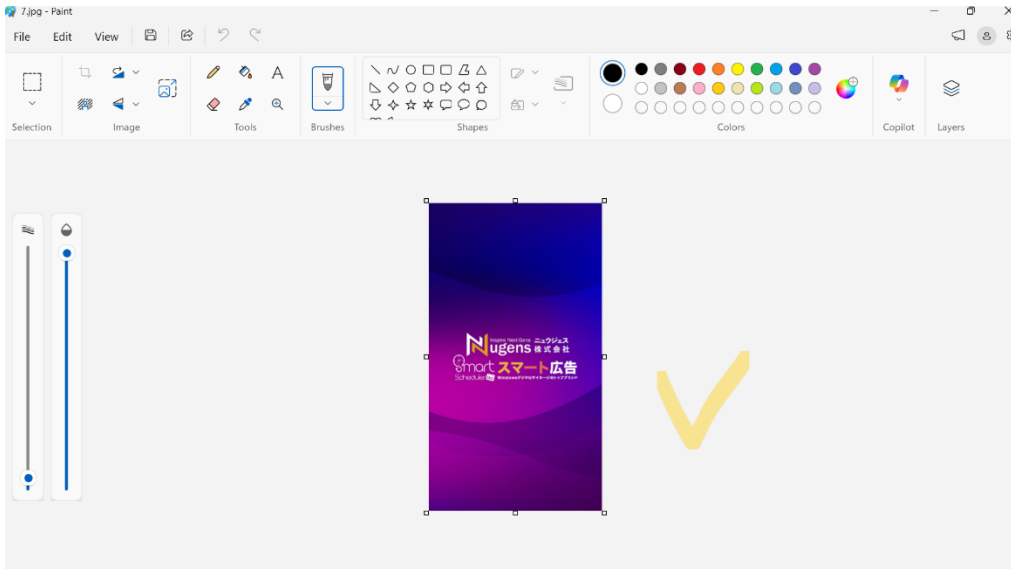

We suggest users use Windows built-in software like Paint app to design and edit photo, but if you are a professional designer, you may use Adobe Photoshop or other software to edit it.

In this showcase, we are using Paint app.

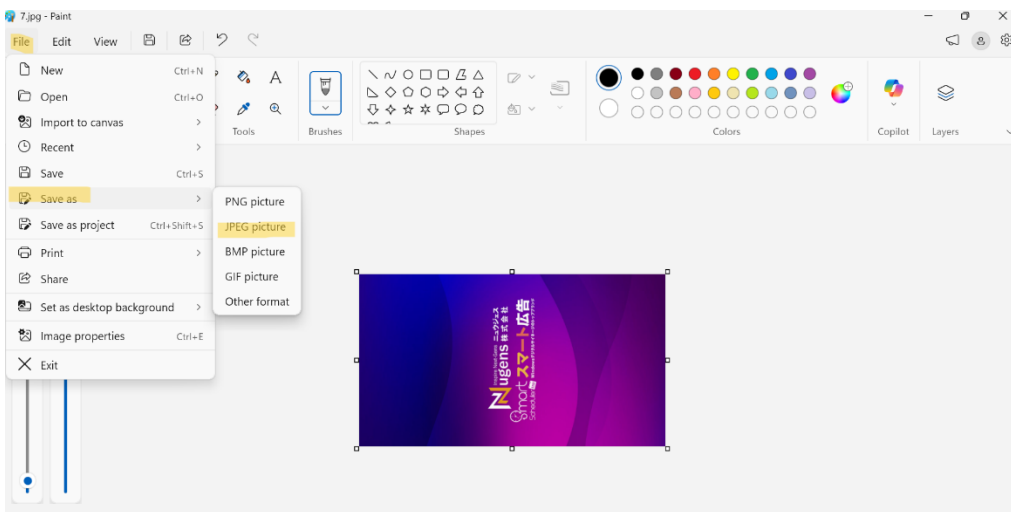

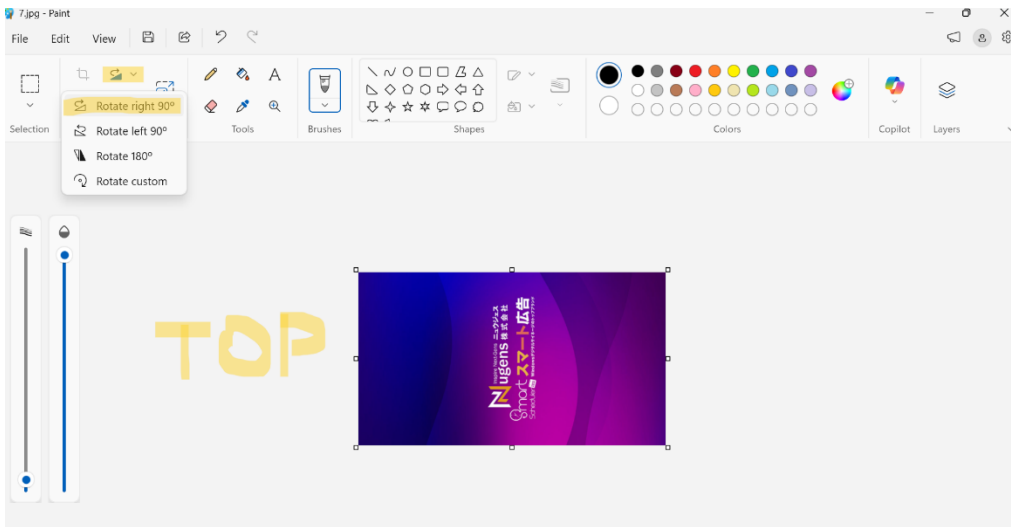

Video Tutorial: https://youtu.be/KngTX2lr6f0?si=abjpFblC0-jh_G8T

Step 1. Open Paint app and insert the image

Step 2. Choose Canva and select the Rotate 90 degrees function, for full display size, please use (W)1920px * (H)540px, after done editing, save the image to a USB drive, so it will display vertical in the device.

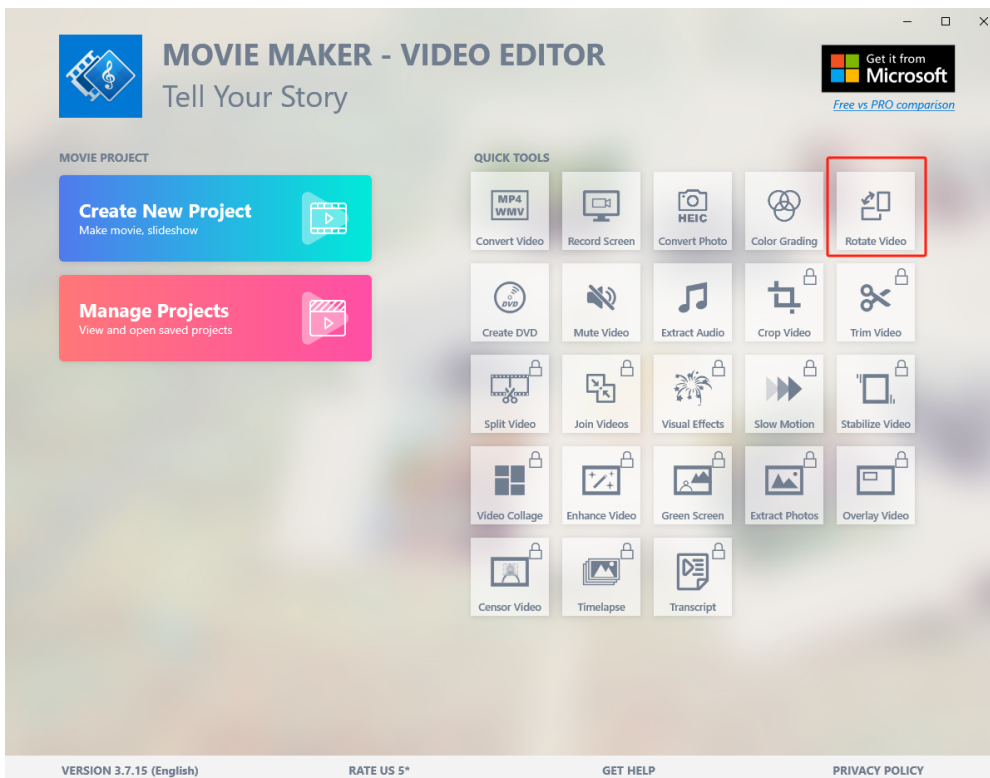

About displaying video playback in vertical

We suggest users use Windows built-in software like MOVIE MAKER to edit the video, but if you are a professional editor, you may use Adobe Premiere Pro, Sony VEGAS or other software to edit it.

In this showcase, we are using MOVIE MAKER.

Download Link: <https://apps.microsoft.com/detail/9MVFQ4LMZ6C9?hl=en-us&gl=TW&ocid=pdpshare>

Step 1. Open Movie Maker and select rotate video

Step 2. Select Rotate left and save video, after done editing save the video to USB drive and it will shows vertical playback correctly.
